WORK EXPERIENCE

Software Developer Intern

Ikните Studio Nov 2025 – May 2026

- Optimized React.js components using TypeScript and Tailwind CSS to improve page responsiveness and deliver a smoother mobile experience.
- Standardized API integration setups using custom React Hooks, cutting redundant network requests by 35% and fixing cross-browser visual bugs.
- Built features alongside developers and designers using Git/GitHub workflows, shipping sprint tasks 20% faster.
- Added error boundary components and client-side validation to prevent runtime crashes during user sessions.
- Performed testing to ensure full mobile responsiveness across various screen resolutions.

Frontend Developer Intern

Wandaprep Ltd Jul 2024 – Sept 2024

- Built an interactive student chat feature using Socket.io and Node.js, maintaining real-time message delivery with low latency.
- Developed reusable UI components with React Hooks and CSS Modules, improving consistency and reducing duplicated code across 12 application pages.
- Participated in daily standups and code reviews to improve team code quality and resolve frontend issues quickly.

EDUCATION

Bachelor of Technology (B.Tech)

University of Buea Sept 2021 – Dec 2025

Major: Computer Engineering (Software Engineering)

Coursework: Data Structures & Algorithms, Web Dev, Database Systems, Software Architecture, Computer Networks, Operating Systems.

UI/UX & SEO

PROJECTS

Student P2P Campus Marketplace

Next.js, Go, Tailwind CSS, PostgreSQL [View Repo]

- Built a full-stack campus marketplace enabling university students in Cameroon to safely buy and sell used textbooks and furniture.
- Implemented a student ID verification workflow using document uploads to strengthen user verification during registration.
- Optimized Go and SQL queries to improve search performance and database efficiency.

Personal Finance Tracker

TypeScript, Next.js, Go, SQL [View Repo]

- Built a spending dashboard backed by a Go service, accurately managing 500+ test records and expense categories.
- Implemented RESTful API endpoints with structured validation and error handling for secure transaction updates.

Brand E-Commerce Website & SEO

React.js, Tailwind CSS, Vercel

- Launched a responsive platform for a local brand with optimized page load speeds and semantic HTML metadata.
- Implemented technical SEO best practices and image compression to boost search visibility and organic reach.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Python Programming Certification
